

**Intraoperative Neuromonitoring Certificate Program**

The original publication of the 2022-2023 Catalog and Student Handbook listed the following information about the boot camp for the IONM program:

“This is a mostly online program, with 2 mandatory weekend boot camps (scheduled for Saturday and Sunday), designed for individuals who want a flexible classroom schedule and who may not have access to local neurodiagnostic education.”

This was incorrect, and should have read:

“This is a mostly online program, with 1 mandatory weekend boot camp scheduled across Friday, Saturday and Sunday, designed for individuals who want a flexible classroom schedule and who may not have access to local neurodiagnostic education.”

The correction was published on 1/6/23.
