

Associate of Applied Science Healthcare Administration

AAS Healthcare Administration provides an introduction toward becoming a frontline leader in healthcare. Healthcare leaders make a meaningful impact on their organization by working closely with all members of the healthcare team to plan, direct, and coordinate healthcare services.

Overview

Courses in office management, business communication, finance, business law, and human resources prepare students for various positions to oversee a department or team by learning how to lead people and manage office operations. Students gain clinical hands-on training in their choice of career pathway certificate for medical assisting, phlebotomy, or emergency medical services, which enable them to make the best possible decisions regarding patient outcomes.

Certificate Learning Outcomes

Students who successfully complete this certificate will be able to:

1. Employ skills necessary to direct and coordinate a team to ensure quality healthcare services and efficient operations of a clinic/department.
2. Communicate effectively, appropriately, and professionally in business management situations using correct terminology related to the healthcare environment.
3. Demonstrate problem solving skills related to healthcare management using elements of successful leadership and critical thinking skills.

Associate of Applied Science: Healthcare Administration

TBCC guarantees, at a minimum, the following courses each quarter for the completion of this AAS.
A student can transfer in or take other courses that meet the requirements, though this is discouraged.
